OBJECTIVE

Seeking a role as a web developer within an organization which exemplifies integrity, modern tooling, and room for growth.

EXPERIENCE

Junior Developer for Mess Marketing from 2018 to present

Developed responsive web pages for client projects utilizing Vue.js and WordPress. Lead quality assurance testing for all client projects. Worked with Director to understand, document and transition towards managing agency's DevOps toolchain and release process. Coordinated with project management team to manage content entry, developer workload and release.

Freelance Web Developer from 2017 to 2018

Built functional, responsive web sites for a variety of clients. Fine-tuned site-building methods for environments that call for different merging of frameworks. Utilized Git version control to regulate site growth. Networked with aspiring businesses whom desired ecommerce expertise. Gained connections to a diverse group of peers.

EDUCATION & CERTIFICATIONS

Bachelor's in Psychology, Loyola University of Chicago in 2016

SoloLearn & Code Camp Certifications in 2017

Responsive Web Design, JavaScript Algorithms and Data Structures, Data Visualization, and APIs and Microservices.
